POLYNOMIAL PATTERNS Learning Task: (nomial means  
name or term.) 1. In the activation activity, we looked at four  
different polynomial functions. a. Let's break down the word:  
poly- and ñomial. What does ñpolyñ mean? b. A monomial is

Polynomial Patterns Learning Task Answers 67 Your goal in this section is to take a closer look at some of the ideas in this lesson. The activities will help you assess your understanding of division of polynomials. Answer each of the following completely. 1. If  $r = 2x^3 + 4x^2 - x - 6$  and  $s = x - 2$ . What is ?  
2.

Polynomial Patterns Learning Task. Part 1 - What is a Polynomial? Let's break down the word: poly- and -nomial. What does "poly" mean? A monomial is a numeral, variable,

# Acces PDF Polynomial Patterns Learning Task Answers

or the product of a numeral and one or more variables. For example:  $-1$ ,  $\frac{1}{2}$ ,  $3x$ ,  $2xy$ . Give a few examples of other monomials: What is a constant? Give a few examples:

## ~~POLYNOMIAL PATTERNS Learning Task:~~

2 (a) & (b) Number of white dots =  $(n + 1)^2$ , number of black dots =  $4n$  and total number of dots. in simplest, factorized form =  $(n + 1)^2$ . Assessment task: Sequences and Equations (revisited) 1 (a) Diagram for the fifth pattern: (b) Number of white dots =  $3n - 1$  and total number of dots =  $4n$ .

Performance Based Learning and Assessment Task.

Polynomial Farm. I. ASSESSMENT TASK OVERVIEW &

PURPOSE: This performance task is planned to give students an opportunity to add, subtract, multiply, and divide polynomials in order to solve real-world problems. It is also planned to give students real-world practice factoring completely first- and second- degree binomials and trinomials in one variable.

Polynomials Patterns Task 1. To get an idea of what

# Acces PDF Polynomial Patterns Learning Task Answers

polynomial functions look like, we can graph the first through fifth degree polynomials with leading coefficients of 1. For each polynomial function, make a table of 6 points and then plot them so that you can determine the shape of the graph. Choose points that are both positive and negative so that you can get a good idea of the shape of the graph. Also, include the x intercept as one of your points.

Determine a polynomial that would represent the area of material required if the diameter of the ball is changed by a value of  $x$ . □ Draw a labelled net diagram showing all new dimensions of each part of your box. □ Find the area of the base of your box. □ Find the area of the wasted material.

### ~~MATHEMATICS 10C POLYNOMIALS~~

The result is very satisfying: Theorems 8.2 and 9.1 say that every pattern does occur, and tells exactly how two polynomials are related if they have the same pattern. We could have proved the results of Chapter 5 without ever mentioning patterns, simply by working in the dynamical plane itself.

~~The iteration of cubic polynomials Part II: patterns and ...~~

Students draw on analogies between polynomial arithmetic and base-ten computation, focusing on properties of operations, particularly the distributive property. Students connect multiplication of polynomials with multiplication of multi-digit integers.
