The `List<T>` is a collection. We can use the `foreach` loop to go through all the items and read them. The following code snippet reads all items of a list and prints them on the console. `foreach (string author in AuthorList)`

How To Get All Items In A C# List - C# Corner

The above code opens 'my_file.txt' in read mode then stores the data it reads from my_file.txt in my_file_data and closes the file. The read function reads the whole file at once. You can use the following to read the file line by line and store it in a list: `f = open('my_file',`

As serialized data structures, Python programmers intensively use arrays, lists, and dictionaries. Storing these data structures persistently requires either a file or a database to work with. This article describes how to write a list to file, and how to read that list back into memory. To write data in a file [/[writing-files-using-python/](#)], and to read data from a file [/[reading-files-with ...](#)

List is equivalent to arrays in other languages, with the extra benefit of being dynamic in size. In Python, list is a type of container in Data Structures, which is used to store multiple data at the same time. Unlike Sets, the list in Python are ordered and have a definite count. There are multiple ways to iterate over a list in Python.

Iterate over a list in Python - GeeksforGeeks

The A-List is a series of young adult novels by Zoey Dean. The series, about a group of rich friends who live in Beverly Hills, has ten books, with the first eponymous novel being released under the Little, Brown imprint Poppy. A spin-off series with new
