Through ten examples of ingenious experiments by some of psychology's most innovative thinkers, Lauren Slater traces the evolution of the century's most pressing concerns—free will, authoritarianism, conformity, and

morality. Beginning with B. F. Skinner and the legend of a child raised in a box, Slater takes us from a deep empathy with Stanley Milgram's obedience subjects to a funny and disturbing re-creation of an experiment questioning the validity of

psychiatric diagnosis. Previously described only in academic journals and textbooks, these often daring experiments have never before been narrated as stories, chock-full of plot, wit, personality, and theme.

In the Polish city of Lodz, the brothers Ashkenazi grew up very differently in talent and in temperament. Max, the firstborn, is fiercely intelligent and conniving, determined to succeed

financially by any means necessary. Slower-witted Jacob is strong, handsome, and charming but without great purpose in life. While Max is driven by ambition and greed to be more successful than his brother, Jacob is drawn to easy living and decadence. As

waves of industrialism and capitalism flood the city, the brothers and their families are torn apart by the clashing impulses of old piety and new skepticism, traditional ways and burgeoning appetites, and the hatred that grows between faiths,

citizens, and classes. Despite all attempts to control their destinies, the brothers are caught up by forces of history, love, and fate, which shape and, ultimately, break them. First published in 1936, *The Brothers Ashkenazi* quickly became a best seller as a

We live in an age when the cigarette industry is under almost

Access Free Winesburg Ohio Oxford Worlds Clics

constant attack. Few weeks pass without yet another report on the hazards of smoking, or news of another anti-cigarette lawsuit, or more restrictions on cigarette sales, advertising, or use. It's somewhat surprising, then, that very little attention has been

Access Free Winesburg Ohio Oxford Worlds Clics

given to the fact that America has traveled down this road before. Until now, that is. As Cassandra Tate reports in this fascinating work of historical scholarship, between 1890 and 1930, fifteen states enacted laws to ban the sale, manufacture, possession,

and/or use of cigarettes--and no fewer than twenty-two other states considered such legislation. In presenting the history of America's first conflicts with Big Tobacco, Tate draws on a wide range of newspapers, magazines, trade publications,

rare pamphlets, and many other manuscripts culled from archives across the country. Her thorough and meticulously researched volume is also attractively illustrated with numerous photographs, posters, and cartoons from this bygone era.

Readers will find in *Cigarette Wars* an engagingly written and well-told tale of the first anti-cigarette movement, dating from the Victorian Age to the Great Depression, when cigarettes were both legally restricted and socially stigmatized in America.

Progressive reformers and religious fundamentalists came together to curb smoking, but their efforts collapsed during World War I, when millions of soldiers took up the habit and cigarettes began to be associated with freedom, modernity, and

sophistication. Importantly, Tate also illustrates how supporters of the early anti-cigarette movement articulated virtually every issue that is still being debated about smoking today; theirs was not a failure of determination, she argues in

these pages, but of timing. A compelling narrative about several clashing American traditions--old vs. young, rural vs. urban, and the late nineteenth vs. early twentieth centuries--this work will appeal to all who are interested in America's love-hate
